A creator moved to inspire wonder and tease the imaginations of a diverse audience. As a designer, I strive to brighten people's daily lives, support their work, and realize their ideas. I have 20 years of experience spanning visual design, UI/UX design, prototyping, and web development. I am looking for opportunities to apply my design talent to advance the growth of purpose-driven organizations.

KEY ACCOMPLISHMENTS

Led the design for the end-to-end development of a social media iPhone app for travelers. Iterated UX flows based on user testing of prototypes, beta products and App Store releases in multiple countries.

Designed a customized workflow tool to attract an enterprise client to a cloud software company. Not only did the client adopt this tool as their main business operating system, but the product has scaled to become the software company's flagship platform.

Created graphical mock-ups of complex data displays for a technical team developing a product for clients to identify and address their global supply chain vulnerabilities.

Founded the role of Lead Designer at an e-commerce company. Managed the workloads of 4-6 UI and web graphic designers, established workflow guidelines, and initiated the transition of an older front end codebase to current mobile-friendly standards.
